

FLANGE FACING MACHINES

A RANGE OF INTERNAL AND EXTERNAL FLANGE FACING MACHINES COVERING DIAMETERS OF 1" to 120"

We supply robust flange facing machines for onsite tasks such as Flange Facing, RTJ Grooving & Lapping, Lens Ring Machining & Polishing, Tube Sheet Facing and Back Facing.

We have a large range of different machines available to cover machining of flanges from 1" to 120".

To maintain high levels of accuracy our machines have a variable feed rate to achieve your desired surface finish, to suit all gasket types.

We can supply OD Mount, ID Mount and Hand-held options and various drives methods: pneumatic, electric, hydraulic and manual, are available.

Manual Flange Facer

Pneumatic Mini Flange Facer

Internal Mounted Flange Facer

Please contact us with your specific requirements and we will be happy to recommend a suitable machine.
